Composite Rolls: Nickel Mine, Western Australia

Project Highlights

Install Date: 5th May, 2013

Client: Nickel Mine

Scope: Head to head trial against two leading composite roll manufacturers.

Product Involvement

HDPE Composite trough and return rolls installed alongside competitive rollers on three separate conveyors.

All three manufacturers products were monitored at regular intervals with operational hours recorded.

Operating Specifications

Conveyor: 3 Various

Belt Width: 1050mm

Roll Locations: Trough and Flat Return

Belt Construction: Fabric

Project Update:

After +- 3000 hrs, rollers from both competitors was noted as failed or in the process of failing.

The Belle Composite idlers as seen above were still in full working order.
