To whom it may concern

17 December 2014

This letter serves to confirm that our customer Omnia Fertilizer (www.omnia.co.za) South Africa, is a user of Lorbrand Composites HDPE conveyor rollers in their process plant. The customer has evaluated a number of manufactures in the past including Precismeca Melco and Mega roller. Lorbrand Composite's rollers have outperformed in this tough environment and is now the roller of choice with over 300 rollers in operation and more to be installed next year.

The conveyor belts in use are ply belts, width 450mm, 600mm, 750mm, 900mm and 1200mm.

All rollers are 127mm in diameter with 25mm shafts (6205 bearing) .The carry rollers vary in length from 170mm, 290mm and to 450mm. Flat return rollers vary in length from 500mm, 688mm, 840mm and 994mm. Please feel free to contact us.

Yours Sincerely

Elsbeth Stewart
